

# Kartell

The  
**WELCOME BLACK**  
2010 issue

The "Top Top" style of tables and occasional tables designed by Starck adds three new models to its offerings. The 2010 series features the total transparency of the entire frame combined with the coloured top which makes it look as if it were "suspended". Three versions, three sizes, a thousand uses.

## **KING TOP**

Design Philippe Starck with Eugeni Quitllet

The first large completely transparent table produced by Kartell. The round top measuring 120 cm in diameter sits on a single column made of injection moulded transparent thermoplastic. The tempered glass of the rigid table top lends itself to a variety of uses and comes in colours such as red, white, black and smoke that give it a touch of originality.

The central conical leg broadening towards the base and rising towards the top provides the frame with stability. The hollow nature of the leg invests the frame with lightness and harmony.

Material: transparent or batch coloured polycarbonate  
Size: H 72 cm, diameter 120 cm  
Colour: Leg: crystal, black matte  
Top: crystal, red, white matte, black matte

## **TOP LESS**

Design Philippe Starck with Eugeni Quitllet

A versatile occasional table, ideal for the home, contract and for indoor and outdoor settings, with simple, essential lines which are nevertheless innovative and surprising. The coloured top measuring 70 cm looks suspended in mid-air since it sits on a single mould base of completely transparent thermoplastic composed of a hollow central leg that tapers down to a round base.

The tempered glass top is solid, scratch resistant and perfect for frequent use.

Material: transparent or batch coloured polycarbonate  
Size: H 72 cm, diameter 70 cm  
Leg colour: crystal, black matte  
Top colour: crystal, red, white matte, black matte

## **TIP TOP**

Design Philippe Starck with Eugeni Quittlet

TipTop is a small side table, agile and light; it has a single base on which a round top rests, diameter 40 cm. The combination of the coloured top and the hollow transparent leg gives depth to the structure. The top comes in a vast range of colours.

Material: PMMA trasparente o colorato in massa  
Sizes: H 51 cm, diametro 48 cm  
Colour: transparent: crystal, orange, red, violet, green, blue  
mat: white, red, black
